

**MILITARY TRAINING AREA
NOVOGRAD-VOLYNSKIY, USSR
CARPATHIAN MD**

A military training area covering approximately 35,000 acres is located immediately north of Novograd-Volynskiy at 50-38N 027-39E (Figure 1). The Novograd-Volynskiy--Korosten railroad divides the area approximately in half.

The south portion contains Novograd-Volynskiy Army Barracks Southeast (BE No [REDACTED]) and the following training facilities: A figure 8 wheeled-vehicle driver training course, a tracked-vehicle driver training course, a probable known distance small arms firing range with a maximum target distance of 2,000 feet, and four moving target tank firing ranges--one with three 1,400-foot firing lanes and no visible target runs, one with two 1,300-foot firing lanes and two target runs with a maximum target distance of 2,800 feet, one with two 2,100-foot firing lanes and three target runs with a maximum target distance of 2,500 feet, and one with two 1,500-foot firing lanes and two target runs with a maximum target distance of 3,200 feet.

The north portion contains a tracked-vehicle driver training course, a troop combat training area, three AAA sites, a bivouac area, an apparently inactive possible fixed target firing range with approximately six 1,150-foot

firing lanes and a maximum target distance of approximately 3,000 feet, and four moving target tank firing ranges--one with three 2,900-foot firing lanes and approximately three target runs with a maximum target distance of 4,400 feet, one with two 2,100-foot firing lanes and five target runs with a maximum target distance of 3,600 feet, one with three 2,000-foot firing lanes and four target runs with a maximum target distance of 3,300 feet, and one with approximately six 2,300-foot firing lanes and three target runs with a maximum target distance of 5,000 feet.

A study of photography from [REDACTED] KEY-HOLE missions between [REDACTED] revealed a gradual increase in activity at this installation up to [REDACTED]. No activity was observed on snow covered photography of [REDACTED].

The area is served by primary and secondary roads from Novograd-Volynskiy. The Novograd-Volynskiy--Korosten railroad passes through the area but the presence of rail loading ramps could not be determined.

No artillery impact areas, engineer training or water-crossing training sites, or airborne or air transportability training facilities were observed.
